

Pull Method Guide

Overview: This guide explains the steps to pull accounts using various tools and methods. The key aspects include gathering necessary information, selecting proxies, and submitting requests to change account details.

Tools Required

Names

- Old CN Lines
- Old Gamerdvr Lines
- Purchased Names (from users like [gastoh](#), [@i5aac](#), or [hq.sellauth.com](#))

Proxies

- IP2World: [ip2world.com](#) (Socks5 Proxies)
- Piaproxy: [piaproxy.com](#) (Socks5)

Proxy Extension

- Proxy Switcher: [mybrowseraddon.com](#)

Fresh Emails

- Mail Providers: Mail.com, Outlook.com, or ACCSMarket: [accsmarket.com](#)

Finding Account Location

To begin pulling an account, you need to identify its location.

1. Octosniff:
 - Free Version: [xresolver.com](#)
 - Paid Version: [beta.octosniff.net](#)
2. If IP information doesn't appear, use a tool like Lil Surt (owned by @japgon).
3. DB Leaks:
 - Possible leaks may share the same username.
 - DB bots are available here:
 - [t.me/db_Oxinfobot](#)
 - [t.me/LeaakOsintbot](#)
4. IP Location Lookup:
 - Use [IPFingerprints](#) or Lil Surt for IP location.
 - Once you have the location, you can use IP2World to find a matching proxy.
Example: [Image 1](#)

Setting Up Proxy

1. **Find a Suitable Proxy:**
Use IP2World or Piaproxy to find proxies that match the ISP and are close to the target location (e.g., "Houston").
 - Example: [Image 2](#)
2. **Port Forwarding:**
Forward the proxy to the correct port.
 - Example: [Image 3](#)
3. **Enter Proxy in Extension:**
 - Use Proxy Switcher to input your forwarded proxy IP and port.
 - Enable "Manual Proxy" in the extension settings.

Ticketing the Account

1. **Open Browser with Proxy Extension:**
Make sure your proxy extension is active.
2. **Ticket Steps:**
Submit the ticket with the following details:
 1. **New Email:** Use a fresh email address (e.g., from Mail.com, Outlook).
 2. **Account Identification:** Use information like the account ID (from RaikaCheckerBot: [Raika Checker Bot](#)).
 3. **Display Name:** Input current display name and prior console name.
 4. **Location and Name:**
 - If you don't have the name, use the display name.
 - For location, input your proxy location.
 5. **Connected Accounts:** Use the consoles found in Raika.
 6. **Payment Information:** Skip.
 7. **Request Submission:** Request account changes (e.g., "Please update my email" or "Can you change my email?").

Additional Tips

- **Spamming OGE:** Once the account is pulled, download the PDF and use the [Devil Flood Bot](#) to spam the OGE. This step ensures the account remains pulled.
- **Avoid Low-Quality Accounts:** Many sellers don't perform this, and that's why purchased accounts often get pulled back.
- **Undeliverable Emails:**
Use the following Epic Games link to check undeliverable emails:
 - [Epic Games Help](#)
- **Finding Accounts by IP:**
To find accounts from your location:
 - Use Xresolver for Xbox or PSN.
 - Use IPFingerprints to find your IP and input it into Xresolver.

FAQs

1. Private Tools:

No private tools are required for pulling. Beware of scammers selling private tools (e.g., "IPFingerprints").

2. Alternative Tools:

- **Foxyproxy or Thunderbird for bulk pullers.**
- **Use Adspower or common browsers like Firefox or Chrome.**

Important Notes

- **Accuracy: Always try to match your IP to the OGO's IP for better success.**
- **Name Input: For hidden accounts, input ".." if the full name isn't available.**

Reminder: This method has been verified and approved by experienced users. Always avoid falling for scams related to pulling methods.
